Sunny Jhun Ibabao

Metro Manila

+63-9772161294 | sunnyjhun.ibabao@gmail.com | https://sunny-jhun.github.io/mywebportfolio/

It is my highest goal to contribute progress to your growing company as web developer. I like to take challenges and solve them with my abilities and skills acquired from intensive software development training. My previous experience though not related with technology industry is a good stepping stone in order for me to accomplish a given task that will produce a measurable result. I always believe that it is better to say that I know that I know nothing, than saying I know everything. This Socratic paradox reminds me of my lowliness and reveals the reality that learning is a lifelong process, everyday is a good opportunity for learning new things necessary for the progress of this world. I would like to say that it is my ultimate dream to be an agent of transformation for a better future.

ABOUT ME

I observed that this world is ever changing everything is in constant flux. There are many questions about the wonders of technology that disturbed my mind, this led me to discover and satisfy my curiosity, to my surprise the curiosity I have in technology would later become the focal point of my interest and path in life. Tech industry offers a lot of challenges and I really like it. The daily strife does not just end by solving the problem overnight, my potential being a person is being stirred and my skills are being harnessed. I can say that the career I would like to have now is my passion, and love to dedicate my life for it.

I like reading fictional and philosophical books, for me reading can help me widen the knowledge I possess in this world. Reading is really a great pleasure for me. Watching movies is one of my hobbies as well. It does not just entertain me but it also teaches and inspires me a lot to live life to the fullest guided by moral principle.
